

27 January 1965

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT: Alleged Ominous Activity in the

25X1D [REDACTED]

25X1D 1. At the meeting of the USIB this morning you requested that I make a careful check to determine whether or not the mission of 25 January confirmed recent reports on ominous activities in the [REDACTED] area.

25X1D 2. A check with NPIC has been made. That office has carefully reviewed the recent materials as well as those collected since 8 January on the [REDACTED] area and reports that there is no unusual activity observable. I am also advised that the OCI analysts consider the reported activity of troops to be directed at running down suspect insurgents rather than any activity directed against [REDACTED]
